Ehhh i cant justify the cost its a 2 button beater. Needs a remaster 8/10. Only the lighthouse would load and work, the other 6 just flashed you right back to the lobby. the rowboat ride as nice for 3 seconds then got dull. Got a refund. not a keeper in my library. sorry.... **Worth the while!**

gop is a neat little puzzle game similar to the ice sliding puzzles we all despised in the second Pokémon generation. The game itself is quite easy and only two or three of the 50 levels took me longer than a few attempts.

On later levels the game introduces two new features. Teleporting blocks and blocks that alter your path by 90 degrees. They are easy to understand and are later combined to create complex puzzles.

After all it's a fun game to kill about an hour for a pretty cheap price.

PS: You gain four achievements for each stage you finish and some for clicking every button and the logo in the main menu, don't forget these and make sure you leave the game on a little longer to collect all four Steam Trading Cards since you'll be done faster than the drops. ;). Good ol' classics. One of the first games I've ever played on PC.

Scramble all fighters!. Don't know what people expected for 1 dollar or 0.59 while it's on sale. For that much, it's worth it, got a full hour of gameplay out of it.

Nothing extraordinary, but if we had this game back when we had Galaga, we would have been happy.

There are 22 levels in total, boss fights in every 4 and slowly increasing difficulty.

Girls even make ahegao faces, but all lewdness aside, it's a fun time waster.. Fecharam o jogo cabrões!. It's fairly short (about 4 - 5 hours), it's funny, it's got good music, and a lovely graphical style. To me this is a must play.

It has a couple of minor bugs, but nothing that ruins the experience. (There's an item you can pick up twice, despite only being able to use it once. But the inventory seems to be infinite, so it doesn't really do anything other than force you to scroll past one extra item.). Awful polygoned copy of commandos, plays incredible bad

Well put together doco on the early games industry and Atari leading up to the crash. Good interviews with the key people, worth watching.. The first GTA game with the so loved GTA feeling. The whole game is played from a top-down perspective with 3D objects.

You can do missions for rivaling gangs (Zaibatsu, Loonies, Yakutza,...). An important part is dealing with the respect level of these organisations. You can only do missions for gangs with positiv respect level.

But technically you can finish the game without doing missions, because you get points for everything you do in a way.

Additionally you have to juggle your saves. You need to pay 50.000 \$ per save (especially at the beginning this is the money of 2-3 missions).

Wonderful game with outdated graphics, but starting point of one of the best franchises.

btw, my playtime of GTA2 is after GTA:SA the highest.. This is quite possibly the best game I've ever played; superb writing paired with excellent gameplay and AI makes this a worthy purchase.

10/10.. Clash of Clans, только Age of Cavemen.. 100% family friendly. Good choice for kids.. In my opinion, it's a good game. Easy to learn and commands are easy to master, historically correct, Graphics outdated, but the game is very cheap...
